SUMMARY

I am a Japanese-Argentinian web developer based in Yokohama with a strong passion for coding and continuous learning. I started my programming journey in early 2022 and have since completed several Udemy courses covering HTML/CSS/Javascript, React.js, TypeScript, Next.js, React Native, and Three.js. Additionally, I completed the Harvard University online course CS50 Introduction to Computer Science. My language skills include JLPT 2 proficiency in Japanese, an English TOEIC score of 840, and native Spanish fluency. I love learning new technologies to improve my skills and staying current with industry trends.
